

What's New in Latest Release

Companies Act 2006 Changes from 1st October 2008

- New tick box for PLC traded on a "Regulated Market".
- New style paper Annual Return for returns made up to 1st October 2008 onwards.
- New "Significant Shareholders" report calculates the end of day holdings for each member in each class of shares for a specified period and reports on whether the specified "significant holding" percentage has been reached and when.
- When producing a list of Past and Present Shareholders, the software will automatically calculate percentage holdings of each shareholder in each class of shares on a daily basis in order to determine whether they have exceeded the 5% holding criteria for the purposes of the new style lists of Past and Present Shareholders.
- New style paper List of Past and Present Shareholders (Schedule A and B) for returns made up to 1st October 2008 onwards (to take into account new exemptions in certain circumstances from providing members' addresses).
- eFiling of Annual Returns for returns made up to 1st October 2008 onwards amended to take into account new exemptions in certain circumstances from providing members' addresses.

New "Age Exception Report"

- We have added a new "Person" report that gives you a list of all persons across all companies according to age criteria that you enter. This will, for example, allow you to get a report of all directors under the age of 16 at a specified date. From the Company List screen, click on List of All Persons, then click on "Age Exception Report".

New "Action Filter"

- A considerable amount of development work has gone into providing a new "Action Filter". The old "Action List" functionality plus a lot more has now been replaced and incorporated into the "Action Filter" which filters the "Company List" list of companies to show only those companies that meet the "Action Filter" criteria. .
- The Company List screen now has an "Action Report" which produces a report of those companies that match the above "Action Filter".

Action Filter and Report Options in "Actions" and new "Filter" button on Company List screen.

Displayed	Total
1,131	1,132

- The results of the Action Filter can also be output as a CSV "Mailmerge" file.

eFiling Enhancements

- The performance of the eFiling Log on slow networks has been enhanced, providing faster access to the eFiling log data.
- A new facility to "Archive" eFiling Log entries has been added so that old eFiling entries can be removed from the log so as to provide a clearer view of the remaining entries. Archived entries can be restored at any time if required.
- Added support for sending/receiving emails on accounts that require "SSL" (eg. Gmail accounts)

Data Conversion

- The data conversion procedure which is run when the software is updated, now does not re-run the conversion when each workstation (with a local copy of the program files) on a network is updated - the conversion is performed just once when the first workstation is updated.

Print Registers etc. Report

- The selection screen for the "Print Registers etc." report has been enhanced – it now clearly shows the dates criteria used for each section of the report.

Director's Occupation

- Previously, the occupation of a director within a company has come from their details within their "Person" record and hence their occupation within each company had to be the same. We have now added an "Occupation Override" entry within each director's directorship entry where their default occupation in their "Person" record can be overridden in each company.

Cosmetic Enhancements

- This latest release incorporates a number of minor cosmetic changes in order to further enhance the user-friendliness of the software.
